

**Two tales of one city:
Unveiling the sentiments and conceptual
metaphors for a pandemic in Macao**

Vincent X. Wang, University of Macau,
Xi Chen, University of Macau,
Lily Lim, Macao Polytechnic Institute,
Chu-Ren Huang, The Hong Kong Polytechnic University

- 01 The Question & the Project
- 02 Data & Method
- 03 Results
- 04 Discussion

The Question

To what extent can we understand Macao residents' lives during the COVID-19 pandemic by examining textual information in both the prominent official and social media?

We examine:

- **Theme**/topic/topos (cf. Baker et al. 2008)
- **Sentiments** expressed: esp. positive v negative
- **Metaphors** for the pandemic and lives under Covid-19

The Project

**HOPE and PAIN in the Time of a Pandemic:
A Corpus-based Study of Metaphor and Synaesthesia in Macau (Phase 1)**

**瘟疫期間的希望與痛楚---基於澳門語料的隱喻和通感研究
(第一階段)**

**Specialized Subsidy Scheme for Macao Higher Education Institutions
in the Area of Research in Humanities and Social Sciences**

澳門高等院校人文社會範疇研究專項資助計劃

total	75	188	575	390	287	204	1719

Metaphors: types and distributions

- **WAR** (with several subtypes)
- Virus is a **CUNNING PERSON**
- Pandemic is a **MONSTER**
- Pandemic is a **WILD VINE**
- Economy is a **RECOVERING CREATURE**
- **HARD JOURNEY**
- **TIDING**
- Natural **DISASTER**
- **TRIAL**

Multiple interpretations rather than a singular one about the pandemic – which can be effectively captured by distinct conceptual metaphors – need to be endeavoured by policy makers in the middle of the unprecedented uncertainties.

(cf. Chater, 2020)

Discussion

1. Technical issues for sentiment analysis
 - Baidu sentiment analysis tool, for shorter web-based reviews/comments on hotels and so on, rather than longer articles like those in Macao Daily
2. Bentley et al. (2014) two-dimensional model:
 - north-south: informed v impulsive decisions
 - East-West: collectivistic v individualistic approach
e.g., 團結 MD 60 (93.78 per million), CCC 11 (59.7 per million)
3. The 'gap' between Macao Daily and ChuChu Channel in positivity
